Compliance Statement – PFAS and POP

DINOL GmbH confirms, to the best of our knowledge and based on the information available at the time of this declaration regarding raw materials, formulations, and supplier documentation, the following:

1. Persistent Organic Pollutants (POPs)

Our products are assessed taking into account the requirements of Regulation (EU) 2019/1021 on persistent organic pollutants (POPs Regulation). In particular, this Regulation aims to prohibit or restrict the manufacture, placing on the market, and use of the persistent organic pollutants covered by its provisions.
Based on our current knowledge, no substances that are prohibited under Regulation (EU) 2019/1021, or restricted in a manner that would prevent the intended use or placing on the market of our products, are intentionally added to the DINOL products concerned.

2. PFAS – Per- and Polyfluoroalkyl Substances

Based on our current knowledge and on the available information regarding raw materials and suppliers, no PFAS are intentionally added to the DINOL products concerned.
This declaration is based on our current state of knowledge and on the information available to us regarding the raw materials used and their composition.
This declaration will be reviewed accordingly in the event of relevant changes to applicable legal requirements or to the substance-related information available to us.
