## DINITROL Polystar 6050 PLUS

Dear Customer

Continuous improvement, in product performance and competitiveness, is an ongoing process within EFTEC Aftermarket GmbH.

DINITROL 6050 Polystar, now has following, enhanced characteristics;

Cure time before sanding incl. edges, down to 20 minutes maximum (20°C and 50% RH).

Improved adhesion characteristics over a wider range of substrates, including zinc coated steel and unprimed aluminium.

This dynamic product evolution is available now as DINITROL Polystar 6050 PLUS.

Your sincerely,

EFTEC Aftermarket GmbH
