

November 2006

New development stage of DINITROL 9000

Dear customer

As a leading supplier of direct glazing adhesives, to the European OEM industry, EFTEC offers materials to the automotive aftermarket which fulfill all technical and safety aspects, as set by the original manufacturer.

We are pleased to inform you, that our excellent adhesive DINITROL 9000 has been further improved.

New features are:

- Significantly shorter cut off string
- Enhanced decking properties
- Advanced values regarding "Green-strength"

Established attributes of DINITROL 9000 remain unchanged, for example;

- High modulus
- Low conductive
- Cold extrudable
- Crash tested acc. FMVSS 208/212 at minus 17°C
- 1 hour safe drive away time with passenger airbag (Important: No changes the TDS)

We are convinced that these technical enhancements of our DINITROL 9000 will strengthen your position in the market with even higher consumer satisfaction.

This next development stage of DINITROL 9000 will be available from 18/12/06.

Yours sincerely,

EFTEC Aftermarket GmbH

René Kellenberger
Product Manager Glass Replacement
