

## **EFCOAT AB 429 IQ - underbody coating for MAN busses in repair market**

Dear partner

We are glad to inform you, that our product EFCOAT AB 429 IQ is, since December 1<sup>st</sup> 2009, officially registered at the MAN intranet system for the Aftermarket.

The MAN Intranet contains SI – Service Information, where the repair procedures are described in detail.

Every repair shop being on the MAN repair intranet can find all adequate information on the product and process. For the busses produced since 2004 MAN prescribe the use of EFTCOAT AB 429 IQ. Older busses are treated with solvent based systems, DINITROL products are recommended here as well.

For the underbody treatment of busses you can refer to the listed SI numbers:

**For water based application the SI Number is 195912a**

**For solvent based application the SI Number is 23812.**

Please contact the MAN aftermarket repair stations in your market and introduce you as the EAM representative for these materials.

If you have any questions, please do not hesitate to contact me per phone: +46 705 912 088, or at E-Mail: [otto.uher@eftec.de](mailto:otto.uher@eftec.de)

With best regards,

EFTEC Aftermarket GmbH
